

## SELECTIVE MEDIA STORAGE BASED ON USER PROFILES AND PREFERENCES

### Abstract

5           In an embodiment, a method includes receiving a signal having a number of  
frames into a device coupled to a display. The method also includes retrieving a  
past viewing profile for a user of the device and at least one cue regarding viewing  
preferences provided by the user. Additionally, the method includes storing at least  
one sequence that is comprised of at least one frame based on the past viewing  
10 profile of the user of the device and the at least one cue regarding viewing  
preferences provided by the user.
